Frameworks	SpringBoot
Web Technologies	HTML, CSS, XML, XPATH
Defect Tracking Tools	HP Quality Center, Bugzilla, ITSM
Mapping Tool	Hibernate ORM
Configuration Tools	Maven, Jenkins, Gradle
Operating Systems	Windows 8,10 and Mac.
Additional Skills	SAP Basis, SAP Data and Document Archiving, SAP Solution Manager Tool
Testing Tools	Selenium Web driver/IDE, TestNG, QC, QTP

Project Experience

Project : Recipes and more (Launchcode liftoff project)

Dec 2017 – Till Date.

Role : Java Developer.

Description : As a part of Launchcode liftoff, developing my own Food Website where there will be articles based on different recipes and some products related to food recipes to sell. There are 2 types of user, User_admin and User_others with different authorization levels. The website supports user login,new user signup features for users. The User_admin can Create/edit/delete recipes whereas User_other can view recipe posts and add them to the favourite list, for that they need to log in first.

In addition to this, every user has ability to buy a listed product online.

Roles and Responsibilities:

- ◆ Working on Agile scrum methodology.
- ◆ Developing **Shopping cart and Favourite list** feature.
- ◆ Creation, deletion and editing blogs for recipe article are also developed
- ◆ Have security aspects so that user have secured account.
- ◆ Perform design,code,unit testing of the complete application.
- ◆ Debug programs, identify and resolve the issues.

Technologies: Java(J2EE), SpringBoot, Spring MVC, Hibernate, MySQL, JPI, HTML, CSS, Bootstrap.

- ◆ Learned Defect Cycle Management.

Technologies : Selenium, Java , Maven , QC, ALM

Company : Accenture Services Pvt Ltd.

Project : AMO 1- SAP Support

Client : BHP Billiton

Designation : Software Engineer

Mar 2011 – Apr 2014

The complete Business of the BHP Billiton is managed by Customized SAP System via Standard SAP Business workflows. The main purpose of Archiving is to reduce size of documents/data available and save them on the storage system, so that they can be retrieved and accessed whenever required. Archiving in AMO project deals with Archiving of Document (Invoices, Purchase Request, Goods Receipt and Service Entry Sheet) through regular interval of Batch Jobs. These Documents are archived and Stored on Storage system Named Open Text Archiving.

Soft copy of the receipts for the purchased items such as Coal, Aluminum etc. are received in the System which are then scanned again using a scanning Tool to convert those receipt to some define standard format. These receipts are then imported in SAP System using the interconnections between the tool and SAP and then these imported receipts are saved on storage system. This type of Archiving was used only for Receipts. But for Attachments in Purchase order, Purchase request and SES they are directly browse via local machine of user and then Archived and saved on storage system using SAP.

Roles and Responsibilities:

- ◆ Worked on SAP Data and Document Archiving. Daily Monitoring of different Archiving related activities.
- ◆ Monitoring and Maintenance of Open Text System 9.7.1
- ◆ Handling of production critical Incidents and change Requests.
- ◆ Monitoring and resolving errors of Background Jobs and RFCs.
- ◆ Involved in Installation of BPM in Development system.
- ◆ Performed pre and post installation activities across the landscapes for Solman and Archiving.
- ◆ Co-ordination with SAP MM, Workflow, ABAP, FI teams.
- ◆ Raising OSS Message and applying OSS notes to resolve issue.
- ◆ Maintained Documents related to different changes in Solution Manager system, creating new project in Solman, Maintaining Cycles for different releases periodically, maintaining automation of transport in Solman (STMS)
- ◆ Client maintenance tasks such as client Copy, creation of new client, deleting client, Client opening.

- ◆ Creating User, Mass User, User Groups, Maintenance of User Roles, Check Authorization using SU53 Locking and Unlocking the User.
- ◆ Configuration of system landscape through SMSY, DSWP.
- ◆ Worked on SAP Installation.
- ◆ Performing Unit testing.
- ◆ Worked Independently in **critical Business situation**
- ◆ **24X7 Production on call Support.**
